THE PROJECT

Why exhibit

SAIE - The Building Fair design, construction, plants - is the leading meeting point for the construction market, where companies, professionals, institutions, and associations come together to exchange ideas, share experiences, and discover practical solutions for the entire building supply chain.

The annual alternation between **Bologna** and **Bari** has made SAIE an unmissable event for the industry, capable of engaging every sector of the Italian construction ecosystem.

Since its relaunch by Senaf in 2018, SAIE has started a renewal process that has once again made it a key event in the trade fair industry. Today, the **community of construction professionals** continues to grow, recognizing SAIE as both a key showcase for the market and a dynamic platform for learning, networking, and business development.

SAIE offers an **evolving exhibition format**, characterized by:

- **annual rotation** between Bologna and Bari;
- **an integrated perspective** on design, construction, plants and services;
- a focus on **the construction site and its key players**: building companies, manufacturers, distributors, planners, designers, installers, and skilled workers;
- **an experiential approach** with live demonstrations, dedicated areas, and immersive content on innovation, digitalization, and new materials;
- **a thematic and modular organization**, designed to highlight emerging trends and meet the needs of industry professionals;
- active involvement of **associations, professional orders, and institutional stakeholders**, ensuring authority and strategic dialogue.

SAIE 2026 is the place where the culture of Italian construction comes to life: a hub for companies that want to showcase themselves, build connections, anticipate trends, and contribute to a more efficient, safe, and sustainable construction industry.

THE SECTORS OF SAIE

The construction supply chain in one unique event

- BIM, Building Information Modelling
- Augmented reality, instruments, systems and applications
- Design, control and management software
- Digital manufacturing, artificial intelligence, digital platforms
- Instruments for surveying and measurement, drones, geospatial technologies

- SAIE Concrete
- SAIE Windows and Doors
- SAIE Machines and Equipments
- Waterproofing, Construction Chemicals
- Building envelope and Insulation
- Building Materials and Technologies
- Flooring, wall and floor coverings, Sanitary
- Construction Site Safety
- Industrialized Structures and Systems

- Automation, access control systems, anti-burglary systems
- Digital Buildings, Smart Homes and Digital Cities
- Fire-fighting plants and systems
- Solar, photovoltaic and energy production installations
- Electric systems for buildings
- Installations for sports and outdoor facilities
- Lighting systems
- Remote control systems for buildings
- Ventilation, air conditioning and heating systems
- Smart infrastructures

- Associations
- Technical and media publications
- Building maintenance and administration
- Consultancy services (professional, technical, financial)
- Design, engineering and architecture firms

THEMATIC PATHS

The thematic paths at **SAIE Bologna 2026** guide visiting professionals, helping them focus on the most relevant content of the fair and providing an **integrated overview** of the most **effective** and **innovative solutions** for the **construction industry**.

SUSTAINABILITY

Path dedicated to the environmental and sustainability needs related to construction and property management activities.

Energy Efficiency in Buildings / Seismic / Windows and Doors / Off-site Integration / Wood / Laying and Testing Demo Area / Ceramics and Brick / Restoration Site / Plant Demonstration Area

INFRASTRUCTURES

Thanks to the collaboration with strategic corporate partners and industry associations, we will show in this area the excellence of Italian projects including bridges, viaducts, ports, rail networks, tunnels, roads and highways.

Infrastructure Arena / National Screed and Flooring Forum / Concrete Arena and Demo Area

PEOPLE AT THE CENTRE

SAIE enhances the importance of people and the development of operators' skills by organizing demonstrations, training focuses and awarding of excellence in the Italian territory.

Demonstration Area Safety and Work at Altitude / Cassa Edile Award with CNCE / Ediltrophy with Formedil

INNOVATION

The path dedicated to exhibition areas concerning digitalization, technological innovation, parametric design and digital transformation: key factors for the future of the construction sector.

Digitalization and BIM / Technical Software / BIM Labs / Integrated design and automation Demonstration Area / Diagnostics Square / BIM & Digital Award

VISITORS' REVIEWS

Some **professionals' feedbacks** visiting the **previous edition** of **SAIE**

Planner

"Taking part in SAIE means connecting with the entire construction ecosystem. The initiatives on digitalization and sustainability are particularly interesting." - **Roberta V.**

Skilled Technician

"SAIE once again proves to be a key event for understanding industry trends and engaging with other professionals. The demonstration areas are highly appreciated." - **Marco R.**

Construction Company Owner

"A truly interesting trade fair. I found valuable insights to improve site management, along with solutions related to new materials and innovative construction techniques." - **Giuseppe T.**

Window and Door Manufacturer

"SAIE is a real opportunity for us manufacturers to discover new products, engage with suppliers, and stay up to date on regulations." - **Antonio S.**

Heating and Plumbing Installer

"I attended with my team to explore new integrated building-system solutions. I found interesting partners and cutting-edge products." - **Luca M.**

Tile Layer

"I have been attending SAIE for several years: it is an event that allows me to explore new solutions to improve the efficiency and competitiveness of my business. Always inspiring." - **Alessandro B.**

BIM Manager

"A unique opportunity to stay updated on the most innovative construction technologies. Excellent variety of exhibitors and high-quality conferences." - **Francesca L.**

Purchasing Manager

"I found SAIE extremely useful for reviewing the offerings of multiple suppliers all in one place."
Claudia M.

Demonstration Areas: immersive experiences that **showcase the technical features of products to visitors** through **hands-on trials** and **live demonstrations**
